## ECONOMIC CONTEXT

### International

Global growth remains subdued. The United States further increased tariffs on certain Chinese imports and China retaliated by raising tariffs on a subset of US imports. Additional escalation was averted following the June G20 summit. Global technology supply chains were threatened by the prospect of US sanctions, Brexit-related uncertainty continued, and rising geopolitical tensions roiled energy prices.

Against this backdrop, global growth is forecast at 3.2 percent in world GDP in 2019, picking up to 3.5 percent in 2020 and GDP releases so far this year, together with generally softening inflation, point to weaker-than-anticipated global activity.

The pressing needs include reducing trade and technology tensions and expeditiously resolving uncertainty around trade agreements (including between the United Kingdom and the European Union and the free trade area encompassing Canada, Mexico, and the United States). Specifically, countries should not use tariffs to target bilateral trade balances or as a substitute for dialogue to pressure others for reforms.

Risks to the forecast are mainly to the downside. They include further trade and technology tensions that dent sentiment and slow investment; a protracted increase in risk aversion that exposes the financial vulnerabilities continuing to accumulate after years of low interest rates; and mounting disinflationary pressures that increase debt service difficulties, constrain monetary policy space to counter downturns, and make adverse shocks more persistent than normal.

### National

In Latin America, activity slowed notably at the start of the year across several economies, mostly reflecting idiosyncratic developments. The region is now expected to grow at 0.6 percent this year, recovering to 2.3 percent in 2020. The sizable downward revision for 2019 reflects downgrades to Brazil (where sentiment has weakened considerably as uncertainty persists about the approval of pension and other structural reforms) and Mexico (where investment remains weak and private consumption has slowed, reflecting policy uncertainty, weakening confidence, and rising borrowing costs, which could climb further following the recent sovereign rating downgrade).

In May, the breadth of the tensions widened to include the prospect of US actions relating to Chinese technology companies and the US threat to levy tariffs on Mexico in the absence of measures to curb cross-border migration. While the tensions abated in June, durable agreements to resolve differences remain subject to possibly protracted and difficult negotiations.
